

REMARKS

By this amendment, claim 2 has been changed to set forth 6 to 15 weight percent nickel as opposed to 5 to 15 weight percent, and the weight percent of manganese has been deleted as unnecessary. This clearly distinguishes over the Japanese Furukawa reference, which specifies no more than five percent weight of nickel (Ni). Indeed, Furukawa references to "5.0 or less" makes it clear that the cited reference teaches away from anymore than five percent, thereby precluding *prima facie* anticipation and obviousness.

Questions regarding this application may be directed to the undersigned attorney by telephone, facsimile or electronic mail.
